

# Ball yarn brake

## Original parts – TechnoCorder TC2

To increase your competitiveness, you constantly strive to achieve improvements and further developments. Saurer original parts ensure high availability and proper operation of your machines far beyond the normal machine life.

### Increased productivity with the newly developed ball yarn brake

The ball yarn brake not only increases the availability of the machine, but also makes it easier to operate. There is no need for time-consuming replacement of the brake cartridges, which means that the machine is available again within a short time after a batch change. In addition, the cleaning effort is reduced by up to 70%, especially when processing PE/PP tapes.

### Original parts and service

You will receive the original parts promptly and reliably. With Secos 2.0 you can order the original parts around the clock. Whenever you need help, the worldwide Saurer service organisation is at your disposal.
