

## Outer Yarn Delivery System 2.0

### Original parts – CableCorder CC3 and CC4

To increase your competitiveness, you constantly strive to achieve improvements and further developments. Saurer original parts ensure high availability and proper operation of your machines far beyond the normal machine life.

#### Further development of the Outer yarn delivery system

Based on the CC5 Slim Balloon Technology, we offer our further development of the existing OYDS upgrade (CC4 standard).

The upgrade is available for CC3 machines without OYDS as well as for CC4 machines with the existing OYDS.

The system adapts exactly to the behaviour of each individual spindle in order to achieve the highest energy saving possible.

#### Original parts and service

You will receive the original parts promptly and reliably. With Secos 2.0 you can order the original parts around the clock. Whenever you need help, the worldwide Saurer service organisation is at your disposal

For further information and quotations do not hesitate to contact us.
